VESTIGE

Where Luxury Inspires Craftsmanship.

VESTIGE is the espresso coffee machine that perfectly epitomises elegance and performance. Designed for coffee connoisseurs who demand more, VESTIGE combines state-of-the-art technology with timeless architecture.

With its unique real wood accents and meticulous attention to detail, it transforms every cup into an individual experience.

Featuring advanced brewing technology, VESTIGE ensures optimal temperature stability and pressure profiling, unlocking the full potential of your chosen coffee beans for the perfect extraction of every espresso.

VESTIGE

Digital Control Panel

Digital technology imbues VESTIGE with advanced features for precise espresso brewing. It incorporates programmable PID precision control of the dual-boiler water temperature, ensuring perfect espresso extraction.

The digital display provides real-time variable flow pressure data, allowing for optimal pressure profiling during the extraction phase. An integrated espresso shot timer enhances accuracy, while the programmable eco-power slumber function and advanced boiler external insulation, helps ensure VESTIGE effectively manages its energy efficiency.

Additionally, the independent steam boiler on/off control allows VESTIGE to function purely as an espresso maker – further optimizing energy consumption.

A water tank level monitor ensures users are always aware of water availability, making the brewing process seamless and efficient.

VESTIGE

Manual Fill

VESTIGE features an integral water reservoir that is manually filled, providing a convenient and elegant solution that allows the user to add water directly to the machine without relying on a fixed plumbing connection.

VESTIGE

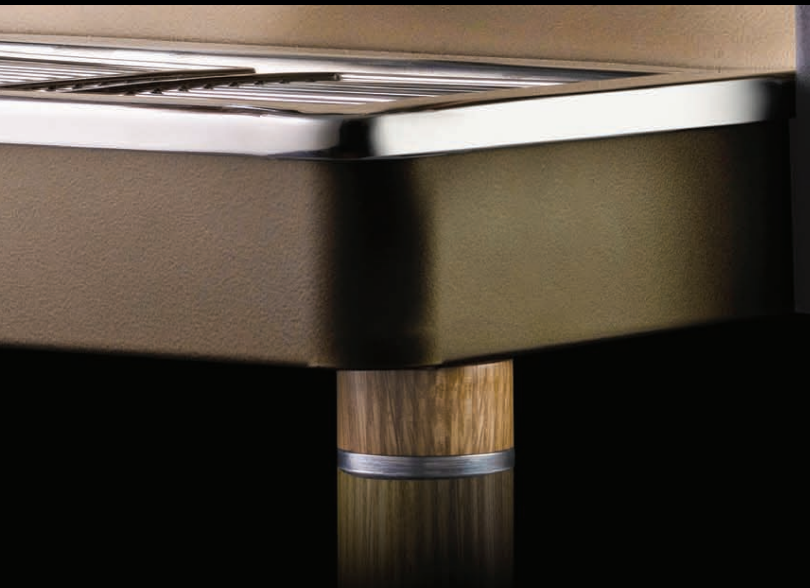

Lever Water Flow Control

This innovative dual valve system with independent paddle operation empowers the user to tailor every espresso shot and individually manipulate extraction profiles in real time for unparalleled flavours.

VESTIGE

Real Wood Detailing

By integrating real wood into the design phase of VESTIGE, the discerning user is rewarded with style that exudes warmth, craftsmanship and sophistication.

The texture of hand-finished hardwood brings tactile class and elegance to the body, handles and feet of VESTIGE – adding touches of individuality and a luxurious experience.
